Dear Mr. William E. Kennard,

ORIGINAL

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

I am writing to inform you of the true need for public, low frequency radio in our communities. I am a local taxpayer and I see the need so that the "Small Community Taxpayers" can voice their own opinions, from politics to home and gardening, from live local artist to just your plain everyday commentary. In this day and age I see a greater need for our young people to voice their opinions in a positive manor. They need the means to express themselves and someone to hear them. I feel that this is one of the reasons that I find living in America so great. It is because we have a country that was founded on democracy. For the freedom of speech is such a great tool, that many, many people obtain and don't realize it. They don't realize how powerful they really are. Please allow and broaden the spread of public, low frequency radio stations in our community and continue to encourage our people to be involved in their community and let them know that their voices are needed. This would allow local small business owners to be able to advertise for themselves at a lower cost in lieu of the more expensive, better-known stations. Allow the community to address issues in the "Community" and not just what is going on with the "State".

RECEIVED

Sincerely,
